

Homework 6

Load the data

`here()` starts at `C:/Users/adenb/OneDrive/Desktop/Git/hw6`

Here is an in-text citation: Tanner-Smith and Lipsey (2015). Here is our second citation (Müller 2020).

Commit 3

Write the code to create the summary statistics shown in the table below. Output the table below and briefly describe it in text.

```
-- Attaching core tidyverse packages ----- tidyverse 2.0.0 --
v dplyr      1.1.4      v readr      2.1.5
v forcats    1.0.0      v stringr    1.5.1
v ggplot2    3.5.1      v tibble     3.2.1
v lubridate  1.9.3      v tidyr      1.3.1
v purrr      1.0.2
-- Conflicts ----- tidyverse_conflicts() --
x dplyr::filter() masks stats::filter()
x dplyr::lag()     masks stats::lag()
i Use the conflicted package (<http://conflicted.r-lib.org/>) to force all conflicts to become
```

Attaching package: 'kableExtra'

The following object is masked from 'package:dplyr':

group_rows

`summarise()` has grouped output by 'sex'. You can override using the `.groups` argument.

sex	frl	math_mean	math_sd	rdg_mean	rdg_sd
boy	no	492.85	46.34	441.46	32.32
boy	yes	469.87	46.09	425.38	26.63
girl	no	501.21	45.96	448.54	34.52
girl	yes	477.51	46.30	430.80	27.42

I created a simple table with white background and bolded headers. The table has 4 rows and 6 columns.
